

Resolution A21-2R1

SFCG SATELLITE DATABASE UPDATE INFORMATION

The SFCG,

CONSIDERING

- a) that it is important that SFCG maintain an up-to-date satellite database for frequency planning and RFI analysis;
- b) that data from non-SFCG member spacecraft containing ITU registered frequencies are of interest;
- c) that the integrity of the SSDB, i.e. its completeness and the accuracy of its data, is of utmost importance to render it a tool that can be reliably used by SFCG members for making new assignments;
- d) that frequency assignments based on a lack of information can result in costly redesign or in severe operational constraints on the satellite project concerned;

RESOLVES

- 1. that member agencies update the database information on their spacecraft projects as soon as it becomes available;
- 2. that member agencies identify an “agency approval person” who will be the primary agency contact and responsible for the accuracy of their agency’s mission data*;
- 3. that member agencies supply current data on national non-SFCG member spacecraft in the bands used by SFCG members whenever possible;
- 4. that the information is incorporated into the SFCG database as soon as any information becomes available, even if incomplete;
- 5. that the information to be supplied is in accordance with the parameters listed in the SFCG satellite database;
- 6. that instructions on the use of the SFCG database are provided in Annex 1;
- 7. to encourage its Member Agencies to use the procedure annexed to RES A12-1R1 for solving their inter-agency frequency coordination cases.

[Annex 1 (from SF22-29) is attached]

* The Secretariat will identify in the Members’ and Observers’ List the nominated agency approval person.
